Union Jacks Defeat Lethbridge Aces In First Game of Series

In a game packed with fight and thrills, and played before a fair crowd last Monday night, the Union Jacks came out on the long end of a 37-24 score against the Lethbridge Aces in the first of their home and home games to decide who will represent this district, in a home and home series with the Calgary team, and the winners of the second series will meet games for the Provincial University of Alberta Golden Bears in home and home crown.

Snow for Raymond opened the scoring when he dropped a beauty through the hoop for two points, almost before the sound of the whistle had died away. However, this was the signal for a checking game, that has seen few equals on the local floor, both teams being checked, almost in their tracks, despite numerous solo rushes and breaks and scoring was difficult. Three or four men would go down on the ball at a time, bottling a player up to prevent a shot, and the first half ended 13-14 for Raymond, after the score being tied at least half a dozen times, and everyone wondering which team would take the game.

In the second half the Jacks got away a little better. Whether the visitors were getting tired, or the Jacks just clicking better, no one can say, but the locals found the hoop more frequently and gradually edged away from the Aces a point at a time to have the final score read 37-24.

The players and score was as follows:

ACES: Donaldson 5; Hislop 1; Peterson 4; Keel 9; Dunlop 5; Nielson; Hamilton, Howard. Total 24.

JACKS: Turner 14; Snow 7; Nilsson 8; Ken Hague 2; A. Hague 5; B. Fairbanks, Van-Orman 1, Total 37.

Paul Dahl and Sammy Moscovitch had the whistles for this game.

In a fast and furious preliminary the Lethbridge Collegiate defeated the Raymond Idlers 40-36. Playing a fast short passing game of ball, the Collegiate continually broke away from the Idlers to bulge the hemp, despite the efforts of the locals to stop them. Bennion, of the visitor's lineup has speed to burn, is a very good shot, and when he breaks on one of his running shots, it's just too bad for the player who has the responsibility of stopping him. A few more seasons on the floor and he should be a decidedly valuable asset to any team.

ACES HERE TONIGHT
The Lethbridge Aces will be

TOWN COUNCIL MEETING

The Town Council held a special session Thursday night to consider a number of important town matters. The topic of relief, which has been growing very rapidly during the recent severe weather, was discussed for a long while, the Council desiring to evolve some system that would be fair and equitable to all those needing assistance. The final decision was to furnish a list of staple groceries to each store and then give recipients of relief a blank order each week for a set amount of goods. It was felt this would save a lot of time in checking orders, and would permit to choose for themselves within the list of allowed goods.

The question of the mill rate was discussed at great length, the increased needs of the new school curriculum calling for additional revenue, and the Town faced with the necessity of devising ways and means of furnishing it. The mill rate was struck at 20 mills for Town and 15 mills for school purposes in town, and 12 mills for school purposes out of town.

O. H. Snow was appointed Assessor, and the Tax Notices will be mailed out the early part of March.

The Secretary also reported on his conversations with the Calgary Power Co., regarding Light and Power rates, and stated they were interested and promised close study to every request he made. He had also met L. C. Charlesworth and talked some with him re the reservoir site.

LEADERS OF JAPAN ASSASSINATED

Premier Okada and Admiral Saito, former Governor of Korea were assassinated in Tokyo, Wednesday in an uprising of young army officers. Finance Minister Takahashi seriously wounded, died later. A provisional government has been organized, and martial law has been declared.

here tonight, playing the second game of the Playdown series between these two teams. The first game went to Raymond 37-24. The Printers of Calgary will be here next Wednesday night in the playoff series of Southern Alberta.

Tonight's game will be followed by the Leap Year Dance sponsored by the Elders Quorum of the Raymond First Ward. A good time is promised all who attend. The game commences at 8 p.m. sharp.

Raymond's Honored Guests Are Gaily Entertained

Wednesday was Old Folks day in Raymond for the Honored Guests of Welling and Raymond. Despite the coolness of the weather, a good crowd gathered, and through the formidability of the Committee and the co-operation of car owners of the Town, heated cars were furnished to gather up all the guests and bring them to the Opera House.

A large number of the ladies were busy at the Opera House from early in the morning, arranging the tables and cooking the dinner, which was served shortly after 1 p.m., when 201 people were seated to a steaming hot dinner of turkey, chicken, roast beef pork and so on, with all the trimmings and every one present had plenty and most of them too much for comfort.

Following the dinner the following program was carried out:

Address of Welcome—Chairman S. B. Card.

Male Quartette—F. R. Taylor and Co.

Musical Reading—Miss Iris Jones.

Vocal Solos, "Home on the Range," and "Old Faithful"—Monte Scoville.

Tap Dance—Miss Margaret Roberts.

Reading—Miss Virginia Zabriskie.

Vocal Solo—Thos. Allen.

Vocal Duett—Mrs. J. H. Walker and Mrs. L. D. King.

Games and conversation occupied the remainder of the afternoon and many of those present went home during the afternoon, 80 were served for evening lunch, and a well attended Married Folks dance concluded the evening.

Frache Bros. and the Marquis Flower Shop of Lethbridge donated the flowers for the day, and on Thursday following the party, bouquets were taken to Mesdames Lottie Graham, Susan B. Hicks, H. S. Allen, John Bascom, Sarah Fraser, Riley Weaver, Jane Collett, J. Powelson, John Christian, D. Selman, H. A. Jones, Annie Jensen, C. Jensen, L. P. Anderson, J. McBride, C. B. Strong, and Henry Salmon, and Mr. and Mrs. A. M. Wilde, Mr. and Mrs. David Richardson, Mr. and Mrs. W. S. Rouse, Mr. and Mrs. Alif Erickson, Mr. and Mrs. Geo. Clarke, Mr. and Mrs. Heber Coles, Mr. and Mrs. J. H. Wall, Mr. and Mrs. Heber Christensen and D. L. Galbraith.

The thanks of the community is extended to the Committee who made this enjoyable day possible which is looked forward to from year to year by the Honored guests of the Town who are compelled to stay in a great deal of the time. The Committee members work quietly and unassumingly, spending days and hours in preparing a day that the old folks will always remember.

Knitting Factory Is Likely to Seek Location In Southern Alberta

SOMETHING ON BANKING

There is much about bank methods and practice that is a mystery to the ordinary man and woman. They know about savings accounts and cheques, but they know little about numerous other services that the banks are prepared to give them.

To enlighten the public on the subject, the Bank of Montreal has just issued a new edition of its booklet entitled "Your Bank and How 'You May Use It'". Prepared "for the purpose of setting forth the many ways in which the bank can serve the individual," this booklet is really a most valuable manual on Canadian banking.

One of the surprises it provides for the reader is the extraordinary range of services which the bank offers to the public. Something like a score of these services is listed and not only is each service explained in language that is easily understood, but the correct methods of procedure are also described.

In the latter connection the booklet is illustrated by reproductions of various bank forms correctly filled out and such points as the difference between "Order" and "Bearer" cheques are explained and illustrated.

Among the subjects dealt with is that of borrowing money from the bank—a subject that is of timely interest and of particular importance. The booklet may be had for the asking at any branch of the Bank of Montreal.

Culminating in a definite statement that the Company would be pleased to come to Alberta in the early spring and investigate the possibilities of locating a Knitting Factory in Southern Alberta sponsors of the movement feel encouraged, and that their efforts have not been in vain.

Because of a lack of definite details there is not much information to give out more than to say, that within the next two weeks or so officials of the Company expect to visit Alberta and study carefully a number of suggested locations, and also go into taxes, rates for light and power etc. The Company is a well established concern now operating four or five factories, and thoroughly experienced in these lines, so that it would not be any experiment with them if they decide to come.

The coming of such an industry to the district would be a big boon to the wool and sheep industry as wool could be processed and manufactured right here. Then, too, they would employ quite a force, which would make a payroll for whatever district they located in that would be a big boon to business.

It is to be hoped that officials of the Province and whatever town or city they decide to locate in, will give the venture every reasonable encouragement and assistance. Alberta needs industries.

SCHOOLS CLOSED FOR FEW DAYS

Raymond Schools, both Public and High, were closed Tuesday for nearly a week the children being instructed to return again Monday, March 2nd.

A couple of fresh cases of Scarlet Fever lead to the precautionary measure on the part of the Health Officer. As far as we have been able to find out no new cases have developed, and it is hoped the modified quarantine keeping the children from congregating in groups will halt the spread of the fever.

L. L. Pack is getting around again now after an attack of rheumatism, and having his tonsils out.

It will soon be time to paint up and clean up. Wonder if the Board of Trade couldn't sponsor a paint-up campaign in the town. It's been some years since a very great deal of painting was done in the town. What do you think about it?

News Notes

I. B. Roberts was a Lethbridge visitor Friday this week.

R. T. Graham sent a truck load of fat hogs to the Lethbridge yards last Wednesday.

Mr. and Mrs. F. R. Taylor were Cardston visitors last Sunday, the guests of Mr. and Mrs. C. O. Asplund.

The battle of the winds Thursday forenoon was interesting to watch, but ended disappointingly. The promise of a balmy Chinook caught cold, and froze up completely, the mercury dropping about 35 degrees in fifteen minutes.

Thursday morning while the Chinook was in progress, we saw Ed Hawk without his overcoat for the first time this year and Ray Knight was putting a rake in its sleigh probably getting ready to rake up the door yard.

M. R. Woolf was at home on Tuesday, a heavy cold keeping him away from the elevator for the day.

Born to Mr. and Mrs. Archie Terry on Sunday, Feb. 23rd, a baby boy. Mother and son are doing fine and Archie is all smiles.

E. N. Peterson was chosen Mayor of Stirling last week, in the first meeting since the election of the Village Council. The inducement of payment of delinquent taxes was the main discussion of the meeting.

C. Bentall was chosen President and Dick O'Brien Secretary, with Messrs. Tucker, Humphries, Batty and Simpson all Raymondites were elected directors of the Picture Butte Board of Trade at its reorganization meeting held last week. We congratulate these men on their progressive spirit.

Municipal Meeting Accepts Annual Reports Stake Priesthood

A fair sized crowd was present at the Municipal meeting Saturday afternoon at the Town Hall to listen to the Financial Statement and the report of the Reeve regarding the affairs of the past year.

The Financial Statement showed a good balance on hand, and all bills of the district paid. The report of the road work done, at such a nominal cost with the new road machinery purchased last summer was very satisfactory to the taxpayers present at the meeting. An extensive program of road building is planned for next year, when likely most work

will be in the west end of the district. The Stirling road was discussed, but no definite decision was arrived at.

A vote of thanks and confidence for the Council and the Secretary was passed. Nominations for Councilors for the LaPrairie district resulted in an acclamation for Art Minor here, Stirling gave Alabertley an acclamation for another two year term. In the Raymond district Fred Romeril the retiring member was re-nominated for this district and an election will be held Saturday to elect a representative.

The meeting adjourned at 8:45.

Meeting Last Sunday

The regular Stake Priesthood meeting was held Sunday last, and considering the weather the attendance was very good. T. Geo. Wood gave an interesting talk on the necessity of organization and order in our lives, and asked his audience to try and imagine what the result would be if everyone commenced to act in their own way. In the things they did in matters of Church and state. He also spoke of the power of Priesthood, and read a remarkable instance of an immediate cure through the power of the

priesthood only a couple of years ago.

The names of about twelve special missionaries were read out who will visit every home in Payment and possibly the Taylor Stake within the next two weeks or so, and hold meetings with the people. The elders are as follows:

Geo. Romeril, Chas. Lybbert, J. U. Allred, J. S. Anderson, Weldon, Bascom, E. J. Scoville, Floyd Hitchfield, J. O. A. Stevenson, J. O. Hicken, W. A. Anderson, E. Rowley, Ezra Paxman and Henry Gibb.

Yearly Library Report Is Very Encouraging

The annual organization meeting of the Raymond Public Library Board was held Friday Feb 21st.

The new members of the board T. O. King and Mrs. Delia Woolf, were present together with the old members Wm. Redd and Mrs. Manilla Meldrum. Wm. Redd was appointed chairman with the library Miss Millie Romeril Secretary.

The report for the year 1935 showed a book circulation of 11,898 while 3,226 persons used the reading room.

The library was opened 146 days, 277 new books were added during the year and about 20 magazines or periodicals are taken. The library boasts about 2,500 books together with numerous magazines, periodicals

and pamphlets. During the year there was spent for books and magazines \$401.89 which earned a grant from the Provincial Dept. of Education of \$188.15.

The splendid support given the library by the people of the town was noted and appreciated. Special mention being made of the Ladies Literary Society. The Book Lovers Score, Dr. J. S. Stewart former M. P. who has been of great help to the library during the 5 years it has been operating and the Town Council without whose help the library could not function at all.

It is cordially urged that everybody make full use of the library and its facilities.

The Chairman.

ANOTHER HARD WINTER

With the cold stretch of weather and snow covered ground reaching almost to two months without a break, the situation of the stockmen of all Southern Alberta is becoming daily more serious, and the plight of the stock more pitiable; and the situation getting beyond the control of stock owners.

The winter of 1919-20 cost Southern Alberta hundreds of thousands of dollars in feed for stock, many of which eventually died even when green grass did come because their systems were so worn down they could not come back. No hay that year was saved, and shipped in feed retailed at untold prices to try and pull the stock through Spring come with fields and prairie a graveyard for hundreds of cattle and horses.

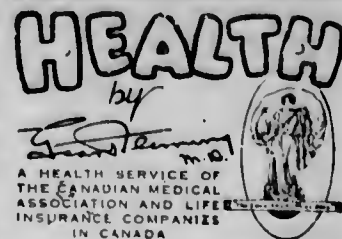

The present winter has not yet reached such serious proportions, and in our immediate district to have the benefit of

the pulp and molasses to ease the situation, while in many other districts the feed is diminishing rapidly, the water holes are freezing up, and stock is trying to subsist on dry straw, and snow.

It is lamentable, that with the number of straw stacks that are burned each year in the fields, absolute waste, doing no good to the field in the way of fertilizer, that a few days of the late fall and early winter could not be used in hauling this straw where it could be used for shelter from the storms that we get each winter, and give stock a dry place in which to rest. Reports come in of stock that have been standing up steadily for three weeks. Imagine the strength that must be used up in this exertion. Strength, which if the stock had a dry, warm place in which to lie down, could be used to keep up their flesh and sustain life.

These severe winters come about every so often. Just as stockmen were getting over the jolt of 1919-20, we are getting another set back which will take the profits of the past few years to offset, if haply the men have stock enough to build up another herd from the left overs of the present winter. Without cash outlay of more than a few dollars the man who grows grain could use his straw to make sheds, where half the straw consumed by a critter in the open field, would keep them

in better shape if they were in a nice warm shed, and blizzards, 40 below zero weather, add the other numerous hazards of winter would not be such a night mare to our stockmen.

YOU CAN'T

Certain questions addressed to the Health Service might be considered flattering because they imply a rather unlimited faith. It is these questions which prompt an article to show that there are many things which we cannot do; we do not know how to do them.

Two words which are not used in medicine are "always" and "never." So it is that we cannot assure our correspondents that something will "always" or "never" happen. We cannot give the unqualified assurance which the quack gives because we have too much respect for scientific truth.

A diagnosis cannot be made by correspondence; it is only possible to make a guess in this way. A doctor does not make his diagnosis solely on the symptoms as described to him by his patient; examination and study of the patient are always necessary. The woman who writes in to ask us if a lump in her breast is cancer should know that we cannot give the answer to her question because all we know is what she tells us. Only an examination will reveal the nature of the lump.

Underweight and tuberculosis are fixed together in the minds of many people who think of tuberculosis, as they have seen it in its late stages, as a wasting disease. You can't recognize tuberculosis, whether in children or in adults, by weight, because individuals who are overweight, who are of average weight, and who are underweight may have the disease.

You can't eat a meal in five minutes and, at the same time, eat your food properly. The human body may be likened to a machine, but it is much more than a machine because you can't have mental health unless you get personal satisfaction out of what you do.

Many people are concerned

about their personal appearance. They spend much time and a great deal of money on so called "beautifying." They believe the advertisers. You can't feed the skin by rubbing in cream; neither can you make hair grow by applying medicines to the scalp, nor remove freckles or pigmented spots with salves or lotions.

You can't break in a new pair of shoes; what you do is to break your feet to fit the shoes, which may or may not be a painful process.

It would seem that more money is spent on laxatives than on all other drugs, and yet you can't cure functional constipation by the persistent use of laxatives. You can't get exercise by riding in a motor-car, nor can you hire someone else to do your sleeping for you. Eating, exercising & resting are things you must do for yourself.

You can't get health through someone else. You must practice health habits yourself.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St. Toronto, will be answered personally by letter.

NEWS NOTES

S. J. Shepherd, Lethbridge Barrister has been mentioned as one for the Supreme Bench to fill the vacancy by the death of Chief Justice J. R. Boyle. Mr. Shepherd is known to nearly all Raymond people.

Young lambs are arriving on some farms in small numbers, and the cold weather makes it difficult to save them from freezing. Many are taken into houses by the stoves for a few hours.

Bill Rouse has had a time keeping a supply of coal on hand, and many trucks have been unable to get loaded at the Lethbridge mines during the severe spell of weather the past month.

Roger Mariotti, 45, of Montreal was killed Monday when a 100 pound icicle dropped off the edge of a building and struck him on the head.

The cattle market is quite drab, there being no demand for fat steers. One feeder states the price for cows and heifers is just as good as for fat steers.

Stockowners are hoping that when the weather warms up it will be gradual, as they fear a sudden warm Chinook would thaw the stock out so fast they would die like flies.

Wednesday's night's Herald carried the report that cold weather Tuesday night froze Lee's Creek solid to the bottom, and left Cardston without water at all. The dynamiting last week released a few small pockets of water but did not materially increase the flow.

EXPERIMENTAL STATION, LETHBRIDGE

WEEKLY LETTER
SEASONABLE APIARY
WORK

At this date the Station Beekeeper has ordered packages of bees needed for experimental work in the bee yard next summer. They should be ordered early to allow the breeder ample time to prepare and ship the bees so that they will arrive on the exact day they are wanted.

It is a busy time at the bee house getting bees ordered and arranging equipment for the coming honey season. Broken and old combs are being replaced by new pieces of foundation while the discarded ones are melted down into saleable wax. Combs are being sorted into different

groups and the frames and supers cleaned and scraped clear of propolis and burr combs. Combs containing a large number of drone cells or which are heavy with old pollen, are either melted down or retained to be placed in the extracting supers in early summer where the bees may have a chance to use the pollen if usable. The drone cells are quite all right for the storage of honey. The well drawn out combs containing only worker cells are reserved for use in the brood chambers, in which group combs containing honey are so placed after they are uncapped and dipped for ten minutes in water at a temperature of 110 F.

Winter Food for Bees

Tests are being carried out at the Station bee yard to find

out if bees can be safely wintered on their own gathered stores and whether early or late gathered honey is equal in quality as a winter food to honey from clover and alfalfa bloom gathered in mid season, or whether it is advisable to remove part of the honey gathered and stored by the bees themselves, and give them sugar syrup.

Beekeepers know that the natural food for the bee is pure honey and pollen as they gather it from the flowers, but observations have proven that alfalfa and sweet clover honey granulate very quickly in low or changeable temperatures, and in the absence of available moisture apply during the winter months, when bees are confined to their hive for long periods at a time, they have no means of dissolving the hardened or crystallized honey. It was found in some tests conducted here, that whole colonies of bees starved to death when wintered on such stores.

The feeding of the straight sugar syrup did not prove altogether satisfactory as a wintering food, since colonies, in which all honey stores were replaced with sugar syrup, were weaker in the spring, and did not expand as readily as where honey and either cane or beet sugar syrup were provided. Just a word about adding tartaric acid to sugar syrup when feeding, as it is claimed that the acid prevents reggranulation of the syrup. Tests here as well as elsewhere indicate that the addition of 10 p.c. of honey to the sugar syrup would serve all practical purposes just as well and required no boiling of the liquid and did not cause recrystallization. Tests show that an abundant supply of proper stores are of vital importance, whichever brand of sugar is used, careful preparation of the sugar is the main thing, and it is essential to avoid even the slightest degree of scorching which causes dysentery, regardless of whether honey, beet, or cane sugar is used.

The reference here is for wintering food for the bees: a less pure food may be given when spring or stimulative feeding is being carried on, or when ever the bees are flying freely and are able to work off any food impurities. The cause of dysentery is that the bee does not void excrement except when on the wing and any residue from food must be retained in their intestines until such time as weather conditions allow them to fly out for a cleansing flight.

During eight years testing of food stores for wintering bees it was found that the alfalfa and clover honey, gathered during the main flow of July, proved more satisfactory as a winter food than did the early season dandelion and fruit bloom or the August golden rod and rosin weed honey.

PASSING AROUND THE PROFITS

Chrysler Corporation has set aside out of 1935 earnings \$2,300,000 for distribution to employees which, Time points out, average about \$40 a man. Profits of the corporation for the year were \$34,997,000. Labor will not reap under this extra piece of money and capital, represented by the stockholders, will not feel the cut in the total profits passed to the workers excessive.

Perhaps the most significant feature is the fact that public opinion regarding co-operation and profit-sharing is growing so important that a manufacturing corporation buys an entire newspaper page to announce a bonus distribution and pay a pleasant tribute to employees who have helped to keep the cork in the red ink bottle—Christian Science Monitor.

Bishop Walker was in Lethbridge on business Wednesday forenoon.

W. R. Howson's motion to have Major Douglas and Professor Magor financial advisers to the Government, appear together before the Provincial House was quashed by a vote of 55 to 7 in the House on Wednesday. Social Credit members voted solidly in opposition of the motion.

FOR SALE CHEAP — Bennett wagon, will haul three ton. Apply at the Recorder Office.

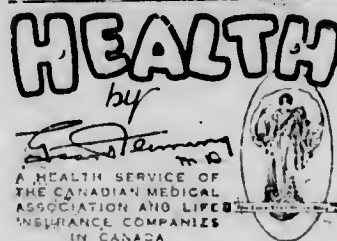

NEWS NOTES

The School of Agriculture thermometer showed the following max. and min. temperatures for the past four days: Tuesday -1 and -23; Wednesday Zero and -22; Thursday 35 above and -10; Friday -13 in the morning.

Sunday will be the first of March. Will it be a month of storm or spring like weather? We should be entitled to some good weather between now and seeding time.

Colin Groff until recently Publicity Commissioner of the Province of Alberta, is now publishing an outdoor magazine in Edmonton. He is known and respected by newspapermen all over the province.

By virtue of Cardston's win over Lethbridge Wednesday evening last the Idlers lost their chance for a berth in the playoffs. Idlers were hoping Lethbridge would win, which would give them another crack at the leadership of the League. Well, better luck next year boys.

MILK

Milk is such an excellent food that every reasonable precaution should be taken to have it safe. Milk contains a pure and safe essential that many of the essentials that many of the food get in it, it is almost a mix.

Milk should form a large part of the diet right through childhood. The protein of milk is used to build new tissues, and there is no better source of calcium (lime) which is needed for growing bones and teeth.

Milk is a desirable food at all ages. A pint of milk a day for each member of the family is a fair allowance. Milk is a food, not a beverage, although we receive it in liquid form. Milk is a cheap food, and it is poor economy to cut down on milk in planning the food budget.

Milk should come from healthy cows. It is obvious that a sick cow will not produce good milk. Furthermore, there are certain diseases which may be spread from the cow to man. The more important of these diseases are bovine tuberculosis, septic sore throat and undulant fever.

Milk should be handled in a clean manner by healthy persons. Many of the dangerous disease germs may be spread by milk if milkers and others who handle milk are either diseased or careless. Impure milk is frequently responsible for disease germs gaining entrance into the human body.

Milk can be made safe. Disease germs are destroyed by heat. Pasteurization makes milk safe because the temperature to which milk is raised during pasteurization will destroy any disease germs which may have gained entrance to the milk from the cow or after milking.

Pasteurized milk is safe milk and it is the best kind to use. Where pasteurized milk cannot be bought, home pasteurization is possible, or the milk may be boiled or milk powder used. Raw milk should not be used in town, city or country because it is practically impossible to be sure of the day-by-day safety of a raw milk supply.

Milk should be used freely by everyone, but only pure, safe milk.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St. Toronto, will be answered personally by letter.

Here and There

Vancouver is holding this year the Centennial celebration of its founding in 1866. Some of the features planned include sports, entertainment of all kinds, music, pageants, a special performance of Shakespeare's "Midsummer Night's Dream" in Stanley Park, a performance of Hawaiian, an Indian village, a Hawaiian village, special decorations and illuminations all over Vancouver. Celebrations will reach their peak in the next ten days of July.

The annual Burns dinner held at the Empress Hotel, Victoria in February at which over 30 Burns lovers took part, the Scotch bagpipes was brought from Vancouver and was played by Miles Gwen Dewar piped around the Empress Hotel room. By Pipe-major "Old Cameron, Greetings were sent from South Africa, Australia, the United States and England.

It is emphatically that success depends on luck, Captain M. Hudson, D.S.O., and R.N.R., commander of Q. Char for two years of the war, has a hard job convincing the "Club International" at Vancouver recently of the truth of the statement. He thought that skill, courage and foresight had something to do with success after hearing and of his adventures.

Some of the Royal York Hotel, held a Cherry Pie Contest open to everybody and prizes in order of merit were given to the winners. The good housewives of the city were all agree. The contest of course had their work cut out for them—or may be they judged of cutting for themselves.

A prominent British resident in Kobe is fighting a big battle against a sacred place which they fear is about to lose their residence, according to passengers arriving in Victoria lately on the Empress of Japan. They can't get it felled because it is believed if that is done, pestilence will strike the district.

The Canadian Pacific's biggest liner, the 42,500-ton Empress of Britain, to be designated "cabin" ship following the abolition of "first class" designation by the North Atlantic Conference, will continue in operation as a high class, high speed, de luxe liner. William Baird, steamship passenger traffic manager of the Canadian Pacific, said recently.

At one end of the Dominion the Eastern International Dog Sled Derby at Quebec, Feb. 20-22 hit the high spots in winter sport and at the other end was the Empress Golf Tournament at Victoria, February 17-22, both sponsored by the Canadian Pacific Railway and each showing the versatility of the Canadian climate, since both were indubitably and entirely successful.

Skiing has reached unprecedented levels this winter with an average of 5,000 skiers taking week-end trips from Montreal to nearby mountain resorts all season and with similar figures available from all over the Dominion.

NEWS NOTES

A. C. Saunders of Lethbridge was a Raymond visitor on Monday.

Sec. O. H. Snow returned from Calgary Saturday in time for the Municipal meeting, his trip not necessitating his journey to Edmonton.

Pat Hamilton, Wm. Armstrong, Homer Grunewald and D. Ferguson of Lethbridge were all in Raymond on Monday.

The Wednesday night Herald carried a photo of Speaker N. E. Tanner in his speakers robes standing beside the Speaker's chair. He is the first Mormon Bishop to hold this position in the British Empire.

Sam Dyson has been busy for two weeks thawing out frozen water pipes. Anyone whose pipes are frozen can have them thawed out for \$3.00 if they will get in touch with Sam or the Town Office.

Sunday was quite a nice day, while sharp most of the day the sun was shining brightly from early morning.

Dr. and Mrs. Leach are spending a holiday in Los Angeles, Cal. The doctor's health has not been very good for some months past.

Pres. H. S. Allen returned Thursday night from attending the Retail Merchants' Convention in Edmonton, having left from Lethbridge on the 6:20 train Sunday evening, his son Heber driving him over.

A couple of trucks collided on Broadway Tuesday afternoon. One was driven by Morrell Elder and one by Lomond Cox. Damage was slight, but both drivers were out looking over their damage.

Messrs Roberts and Whitehead of the Calgary Power Co. Ltd., were in Raymond Tuesday getting a lineup on the power and light load of the town to ascertain what voltage would need to be carried in the feed lines.

PARENTS

Give your Child
this Advantage

SOMETHING every parent of a growing child should know—a survey of 10,000 school children has proved that a typewriter, used for homework, improves general school work enormously. Spelling, reading and composition are especially bettered. Why deny your child this help, when it costs so little?

Not only your children, but you, and all your family, will enjoy using the Remington Portable Typewriter at home.
